25X1 comments. as believed that these trains carried units of the 3d Cds AAA Div which returned from the Wastrow firing range to their military posts. 25X1 a train was dispatched From Neubukow to Magdeburg on 10 September. The evacuation of the Mustrow firing range by 1 October agrees with observations 25X1 made last year. The reference report indicates that almost only outgoing shipments were observed at the Mustrow firing range. 25X1 Colonel Shilev (Inu) was the commanding officer of a unit in Terlin-Gruenau. 25X1 These loadings probably involved units of the IV Arty Corps. In 1951, the units of the 7th Gds Mecs Div did not return to their posts before the second half of October. It is believed that this train carried elements of the 312th Cds RL hegt of the Fourth Cds Pecz Army, which had participated in the emercises held by this army in the area south of Rathenov-Mennhausen. This unloading was connected with a previous unloading observed from Eberswalde. 25X1 As the maneuvers of the Third Shock Army were not completed at the data of unloading, the units involved possibly belonged to this army. 25X1 observed the detraining of units of the 6th Gds Lecz Div in the ber 25X1 Bernau on 26 September J 25X1 division returned to their posts after the completion of summer exercises which terminated about three weeks earlier than in 1951.
